Product Portfolio Takeaways

Electronics is the largest category (21.7% of revenue) but earns only 25.4% margin against 36% overall.

The five biggest brands all earn 25% to 29%.

Profit is spread widely: the 50 most profitable products, out of 1,175, earn only about 16% of it.

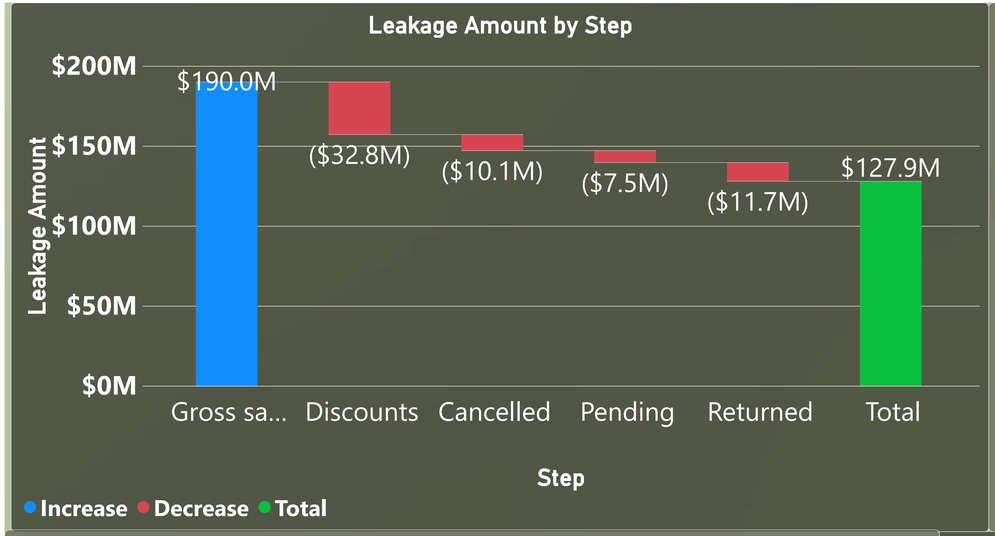

The five lowest-margin subcategories (23% to 26%) are all electronics products: tablets, headphones, TVs, smart watches and laptops. The five highest run from 54% to 61%, and are Grocery and Beauty & Personal Care products.
